HOME HEALTH AGENCIES

Certified Home Health Agencies are licensed and approved to provide home health services under Medicare and Medicaid. Certified agencies provide services such as registered nurses, occupational therapists, physical therapists, social workers and home health aides. A physician’s order is generally needed to receive services under Medicare or Medicaid. Check with your insurance carrier for limits placed on Home Health Care payments by your insurer.

Home Care Alliance of Massachusetts www.hhcam.org/

Non-certified Home Health Agencies cannot bill Medicare or Medicaid. Both certified and non-certified agencies offer skilled services on a private pay basis as well as private pay non-medical services such as homemaking and companionship. There is no need for a physician’s order for private pay services. (Note: Placement Agencies’ workers are considered contractors and not agency employees. Many do not cover workmen’s compensation or payroll taxes; these become the responsibility of the consumer.) Additionally, HESSCO, the Aging Service Access Point, may have resources to consider 781-784-4944

MEDICARE
Health insurance for eligible U.S. residents 65 years of age and older, and some younger individuals with disabilities. Medicare is divided into four main parts. Medicare.gov for more info.

Medicare Part A is usually free. It covers many (but not all) costs associated with hospitalization.

Medicare Part B has a monthly premium and covers many (but not all) costs associated with outpatient medical care. Together, Part A and Part B are referred to as Traditional Medicare.

Traditional Medicare recipients with only traditional Medicare must pay various deductibles and co-payments. Many recipients choose additional insurance coverage to protect themselves from those costs. For those with traditional Medicare coverage, Medicare Supplement (Medigap) plans provide protection from high out-of-pocket medical expenses – but charge premiums. They are accepted by all physicians and hospitals who accept Medicare. Medigap policies do not cover prescriptions, so you’ll need a separate (Part D) drug plan.

Medicare Part C (Medicare Advantage) combines Part A, Part B, and, sometimes, Part D (prescription drug) coverage. Medicare Advantage plans are offered by private companies approved by Medicare. Plans must cover medically-necessary services; but plans can charge different copayments, coinsurance, or deductibles for these services. They also may cover a few services not covered by Medicare. Medicare Advantage Plans, such as HMOs, PPOs, and Private Fee for Service Plans, often have monthly premiums. (You also pay the Part B premium.) Part C plans may restrict where you get care, and which physicians you see.

Medicare Part D, a.k.a. the Medicare Prescription Drug Program, is offered through private insurance companies. Part D plans help pay the cost of prescription medications. Part D plans may charge monthly premiums, co-pays, and deductibles. SHINE counselors can help people choose the right coverage. (See SHINE).

Most PERS are programmed to telephone an emergency response center. The center will try to find out the nature of your emergency. To qualify, head of household or spouse must be 65 or older and meet income limits. Those who otherwise would not file a return, should file a Massachusetts Form 1, along with the Schedule CB to get the rebate. Seniors can claim credits retroactively for up to 3 years. **Supplemental Security Income (SSI)**

SSI is a federal program that provides monthly cash payments to people in need. Massachusetts supplements the federal payment. SSI is for people age 65 or older; and for blind or disabled people of any age, including children. To qualify, you must have little or no income, and your resources must be less than $2,000 if you are single or less than $3,000 if you are married. The value of your home does not count as long as you live in it. Usually, the value of your car does not count. The value of certain other resources, such as a burial plot, may not count either. In Massachusetts, SSI recipients get two separate amounts; one from Social Security for the federal SSI amount and another from the state for the Massachusetts state supplement amount. To receive SSI, you must also apply for any other cash benefits you may be able to get. If you are not a U.S. citizen, but you are lawfully residing in the United States, you still may be able to receive SSI.

UTILITY SAVINGS INFORMATION

Under Massachusetts law, you may be able to keep your utilities from being disconnected for awhile, even if you are unable to pay your bill.

For gas, electric, or water utility shutoff protection: At any time of year, households are protected in which everyone is age 65 or older, unless the utility gets permission from the Department of Public Utilities (DPU). The DPU rarely gives utilities permission to shut off service to elderly households. During the winter months (November 15 through March 15), any household with a financial hardship is protected if the household would be without heat if utility service were shut off. You qualify for financial hardship if you are getting Fuel Assistance, MassHealth, SSI, or TAFDC. Note: Other benefits programs may also qualify. Check with your utility company. You also qualify for financial hardship if your household meets the income limits below.

Household size DPU Financial Hardship Guidelines
For larger family sizes, call the Foxborough COA & Human Services at 508-543-1234 for income limits. If your income is higher than these limits but you are still not able to pay your utility bills, call the Department of Public Utilities’s Consumer Division at 1-877-886-5066 to ask for a ruling in your situation.

Other situations in which shut off protections apply include

Households with a financial hardship where someone has a serious illness. Households with a financial hardship and a child under 1 year of age. Households with a financial hardship in which all adults are 65 years of age or older and a minor child lives in the home. A tenant whose landlord is responsible for utilities but does not pay the bills.

Telephone service through a regulated utility may be protected for: Households in which everyone is 65 years of age or older, Households with a financial hardship where someone has a serious illness, Households facing a personal emergency (such as domestic violence) where not having a phone would put the household at risk.

Noncitizens: Your immigration status does not matter.

Remember - To qualify for shutoff protection, you must register with your utility or telephone company and give them any required proofs. If you are registering for senior shutoff protection, register as soon as everyone in your household is 65.
