

"The Massachusetts Clean Energy Center (MassCEC) and Department of Energy Resources (DOER) have dedicated \$150,000 to the Commonwealth Outdoor Hydronic Heater Change-Out Pilot Program, which aims to replace problematic outdoor hydronic heaters (outdoor wood boilers) with outdoor hydronic heaters approved by the Massachusetts Department of Environmental Protection. We are urging local boards of health to engage operators of problematic outdoor hydronic heaters and encourage them to apply for this grant.

See the attached program manual and application for more information, or visit the [program website](#) at:
